

JOINT, ENABLING

(ES) ROLE 2F

(established in May 2023)

For Public Release

PROJECT DESCRIPTION

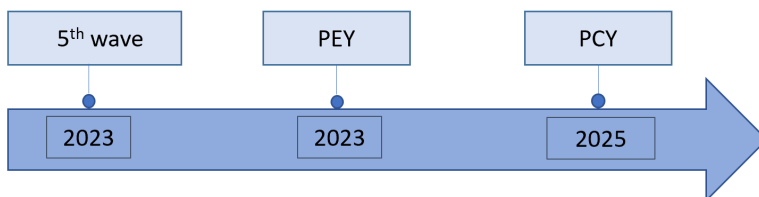

Surgical support is a key factor in medical support improving operational sustainment. The changes in the EU's strategic environment, with new consequent scenarios, highlight the need for rapidly deployable, highly mobile, versatile and with a minimal logistical footprint Medical Treatment Facilities (MTF) to provide medical care, including initial surgery to the casualties in different domains: Air, Land, Maritime and Special Operations Forces. This MTF could facilitate the possibility to ensure the continuum of care providing a critical capability to the Force Commanders.

OBJECTIVES/PRODUCTS

The intent of this project is to increase the EU's joint operational efficiency by developing the concept of the ROLE2 Forward.

INDICATORS

Project Execution Year (PEY) and Project Completion Year (PCY):

DELIVERABLES ACHIEVED

- No deliverables achieved yet.

CRITERIA FOR SUCCESS

- Defining the conceptual development of the Medical Treatment Facility ROLE 2 Forward (MTF R2F) as the Surgical Facility of minor entity with high mobility that allows to provide Damage Control Resuscitation (DCR) and Damage Control Surgery (DCS).
- Establishing the characteristics of medical support based on the employment of the EU Rapid Deployment Capacity within the scenarios determined in the Strategic Compass.
- Addressing the capability gap identified by several EU countries.
- Once the project is completed, the concept will be shared with other structures, such as the EUMS. Depending of the project evolution, and if so is determined by the pMS, a continuation development project could be proposed, within the adequate framework, in order that nations and/or entities which so desire could collaborate in the further development of this capacity.
